

TO: Oxford High School Students
FROM: Mr. Porco, Math Department Chair
RE: TI-84 Plus Graphing Calculator Requirement

Over the next four years you will be taking advantage of the valuable math classes Oxford High School has to offer. These classes range from Algebra to Calculus. As a result, it would be to your benefit to be prepared with a **TI-84 Plus Silver Graphing Calculator**. These calculators are available at Staples and Office Max and cost about \$110.00; watch for sales.

You will be taught all of the strategies on how to use this tool most effectively in each of your math classes. It will be most beneficial to you to have your own TI-84 Plus because you can store personal features that you will need for assignments you are currently working on in class and then keep them for future reference. This will give you an advantage when taking the CAPT state assessment and the SAT for college admittance.

Furthermore, you will use this most effective tool in other classes including science class and tech ed class. You will also be able to use this calculator as you continue your math education through college and beyond.

We in the math department at Oxford High look forward to seeing you in class.
